innovation never ends...

SLIMLINE

SL25 Modern Aluminium Railing with Ultra Slim Design by BTS

SL25 system is characterized by a minimalist design, achieved by slimming the post and railing. Thanks to this, it looks like balustrades made of steel, but at the same time it is devoid of unsightly welding joints.

Like other BTS railing systems, the SL25 SlimLine system has been designed to ensure functionality and maximum safety of use of the balcony despite its smaller cross-sections.

Aesthetic finish!

The aluminium profiles are made of extruded aluminum, powder-coated in any RAL color. The most trend colors are RAL 7016 & RAL 9005.

Quick and easy assembly!

All connections are screwed or riveted on painted aluminium profiles, so there is no need to weld anything. By default, all profiles are available in a length of 6 m and rail profile can be delivered with pre-drilled holes optionally which will provide fast and easy installation.

Guarantee of quality!

BTS Aluminium balustrades are very resistant to weather conditions and require virtually no maintenance throughout their entire service life.
